EXPERIENCE

Flutter Developer Intern	28/01/2023 - 28/02/2023
Baap Company	
Collaborated with a team to develop and launch Flutter applications, actively participating in meetings and code reviews. Implemented key features for an online apparel shop, enhancing user engagement with intuitive design and smooth navigation. Identified and resolved technical issues, ensuring seamless app performance and reliability.	

PROJECTS

UPI payment frauds detection using machine learning
Developed a machine learning model for detecting UPI payment frauds. Utilized data preprocessing, feature engineering, and classification algorithms to identify suspicious transactions. Implemented techniques to enhance accuracy and reduce false positives, resulting in a robust fraud detection system that improves transaction security and user trust.
Coffee shop management
Developed a coffee shop management system using HTML, CSS, and JavaScript. Created an interactive web interface for managing orders,

inventory, and customer feedback. Implemented responsive design for optimal user experience across devices. Enhanced functionality with dynamic content updates and real-time order processing, streamlining operations and improving customer service.

CERTIFICATES

Google Cloud Computing Foundation:
Successfully completed the Google Cloud Computing Foundation course via NPTEL Swayam, gaining a comprehensive understanding of cloud infrastructure, services, and solutions. This course provided hands-on experience with Google Cloud Platform, enhancing skills in cloud architecture, deployment, and management

ChatGPT Prompt Engineering:
Successfully completed a course in ChatGPT Prompt Engineering from Deeplearning.AI. This course provided in-depth knowledge and practical skills in designing and optimizing prompts for ChatGPT, enhancing capabilities in natural language processing and AI-driven interactions.
